10/2024 – Present bengaluru, India	Full Stack Development <i>Masai School</i>
07/2021 – 08/2024 Ahmedabad, India	Bachelor of Computer Applications <i>Rai University</i>

Skills

Technical Skills:

MongoDB, Node.js, Express.js, Responsive Web Design, CSS3, HTML5, Redux, Git, React, JavaScript, Firebase, GitHub

Soft Skills:

Adaptability, Problem Solving, Creativity

Projects

Memetic

ReactJS, Vite, Firebase Authentication, Firebase Realtime Database, Cloudinary, Konva.js, react-konva

- Developed a responsive meme creation and sharing web application using React, Vite, Firebase, and Konva.js, enabling users to design and share custom memes.
- Implemented features such as user authentication with Firebase, interactive canvas editing for memes, and a public meme feed with like and comment functionality.
- Managed cloud storage of meme data with Firebase Realtime Database and Cloudinary, ensuring seamless user experience across desktop and mobile platforms.

Flipkart Clone

HTML, CSS, JavaScript, GitHub

- Developed a responsive Flipkart Clone using HTML, CSS, and JavaScript, featuring landing, login, and product pages.
- Implemented product listing, search, and sort functionalities by fetching data from Firebase Realtime Database.
- Managed version control with GitHub and deployed the project on Netlify for live access.

CivicRoute - Web App for Civic Issues

React.js, Firebase, GitHub

- Developed a user-friendly civic issue reporting platform using React.js, enabling users to submit local problems with photos, descriptions, and locations.
- Integrated Firebase for real-time data storage and management, allowing authorities to view, update, and resolve reported issues efficiently.
- Implemented role-based dashboards for users and authorities, ensuring seamless tracking and management of civic issues through the platform.
